# washing machines and

tumble-dryers' Innovation

# 8 kg in 50 minutes'

they are the fastest-working washing machines

in 50 min.

in 30 min.

in 15 min.

Great solutions in standard sizes.  
[Respond to every need.](#)

Fagor's new machines can handle an 8-kilo load even though they are still of standard size. Also, this 8 kg line offers three excellent programmes, depending on the weight of the load: 8 kilos in 50 minutes, 4 kilos in 30 minutes and 2 kilos in 15 minutes.

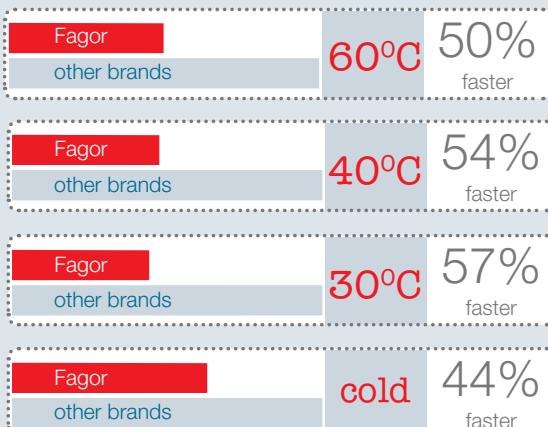

turbo-time  
PLUS

Turbo-Time Plus.

[The washing machines that break records:  
57% faster.](#)

They are the fastest-working washing machines in the market. They wash more clothes in less time, and also have the highest ratings for energy efficiency and wash quality.

In Fagor machines, the most popular programmes, such as Cold, 30°C and 40°C do not take more than an hour, even with a maximum load.

**you win** and so does  
the environment

This generation of Fagor 8 kilo washers aim at a balanced and sustainable relationship with the environment. They have therefore been awarded the highest ratings in energy savings and washing efficiency.

This year we have introduced three new 1,400 r.p.m models in the 8 kg range of washing machines: F-5814 and F-2814.

**designed'** to make your task easier

**ergonomic and  
easy to use**

The innovative design of these washing machines, which makes it so easy to load and unload, is based on these three main characteristics:

- The hatch is 73 cm above floor level.
- The drum is tilted.
- The hatch is large (34 cm).

## ergonomic design

Stainless steel or white base.  
**A more convenient height.**

Because of this accessory, the washing machine is raised up by a few centimetres, for more convenient access to the inside.

It also includes a removable drawer.

**34 cm hatch.**  
**Easier loading and unloading.**

With this large hatch, putting large items into the machine (for example, eiderdowns) will be easier.

**73 cm high.**  
**Access within arm's reach.**

The hatch is 73 cm above the floor, compared to the market average of 61 cm. As a result, the user will be in a more comfortable position when loading and unloading.

**The drum is tilted.**  
**Better access to the clothes.**

Thanks to the drum's position, tilted at a few degrees, access to the clothes is easier.

**tilted drum**

**Instant and automatic opening.**  
**Now, you don't have to bend down to open the hatch.**

Allows the hatch to be opened immediately after the wash cycle has finished by simply pushing the button located on the control panel.

# the information' you can see everything

## 3 viewing panels

Pure simplicity

These display panels allow us to choose easily, simply and precisely; as well as keeping us informed at all times of what is happening in the wash process.

**Large LCD display:** The information is presented clearly. It indicates the wash phases, the speed, delayed start and the easy iron, extra rinse and intensive wash options.

Phases of the wash programme.

Programming using text.

Time remaining.

Programme end time.

Safety lock.

Revolutions/Options/ Functions.

Language selection (15).

Time selection.

**LCD display:** Phases of the wash programme.

**LCD display + LEDs:** Phases of the wash programme.

Programme.

Time remaining.

Time delay.

Safety lock.

Revolutions/Options/ Functions.

your **safety'** is in its hands

**Advanced Balance System.**

A safer wash: Eliminates vibrations, reduces noise and extends the life of the washing machine

This system, exclusive to Fagor, electronically controls and distributes the clothes evenly within the drum during the spin phase. The new stronger body also contributes to the stability and durability of the machine. Washers that have been made safer to last longer.

**ABS**

**Automatic safety systems.**  
**They've got it all under control.**

Peace of mind comes from knowing that, because everything is under control, nothing can go wrong. Fagor washers include all the systems necessary to ensure that the user is worry-free:

- Aquabloc: If the intake tube leaks, water intake is stopped.
- Lock function.
- Suds and overflow control.

giving your clothing the best possible **treatment'**

## special programmes

For special cases

special  
programmes

Professionals in the wash business like Fagor concern themselves with learning and responding to the user's daily needs. So our 8 kilo washers include special programmes. To wash large items, or remove difficult stains such as grass, chocolate or ink.

A different programme for every special case

The 8 kilo line of washers has a series of specific programmes, such as:

- Eiderdown
- Fast: 15 and 30 minutes
- Mixed
- To remove difficult stains
- Antibacterial
- Curtains

**tilted drum**

Clothing care.  
Washes every item more thoroughly.

As the drum is slightly tilted, the clothes move more in all directions, and so are washed more thoroughly.

New interior drum design.  
Clothes are treated better.

The drum has more and smaller holes, so the clothes are treated more gently.

# top loading'

## 5.5 kg load

Larger capacity, for fewer washes

55  
Kg

Fagor's two new models of top-loading washing machines can handle 5.5 kilo loads. This will not only allow the user to reduce the number of washes, but also wash large items and reduce wrinkling.

### Rapid wash.

A small amount of clothes can be washed in just 30 minutes (2.5 kg).

### Hand wash.

It is as safe with delicate and woolen fabrics as hand washing.

### Cold wash.

For all types of clothes.

### Easier to iron.

The result is clothing which is practically wrinkle-free.

A

energy

A

wash

### Eco-fuzzy system.

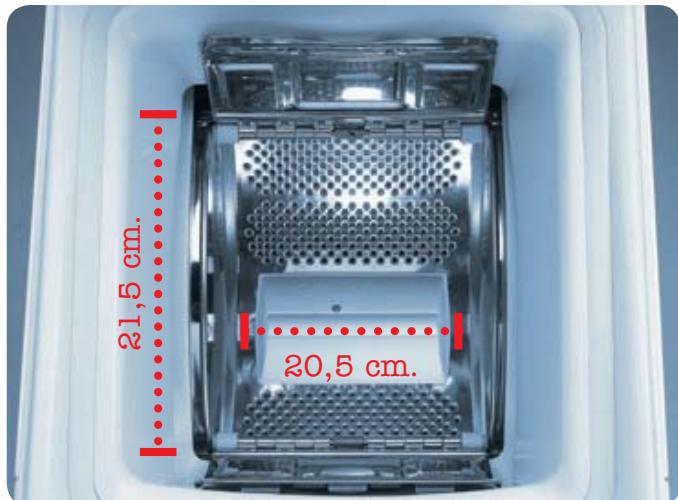

Consumption is adjusted according to the load to give maximum efficiency with maximum energy savings.

They calculate the load of clothing by distinguishing between four levels: small, medium, normal and maximum.

Long Life System.  
Longer washing machine life, more convenience for the home.

Great durability is guaranteed thanks to a stronger structure with anti-corrosion treatment, the only drum on the market made from steel and Politenax, and a new anti-blocking filter.

The comfort level is guaranteed by the lower noise levels, due to special shock-absorbers and counterweights in the drum itself.

With great capacity to drum access: 420 cm<sup>2</sup>.  
More convenient for loading and unloading clothes.

Auto-compensated closure system.  
Prevents the door from falling sharply.

Removable detergent container with four compartments.

## Washing machine accessories

### ACC. SEC. HOSE

Code 995990012

EAN-13: 8413880070780

### Optional anti-flood kit:

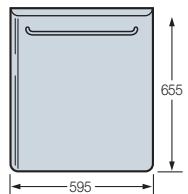

Mechanism that automatically cuts off water outflow if the water intake tube is broken.  
Suitable for the entire front-loading range.

### Optional ITX kit

EAN-13: 8413880095653

Cod. 999010038

For the 3F-3612 and 3F-3610 IT model washing machine

Includes 6 supplementary 10-mm strips  
(Max. height adjustment: 60 mm)
